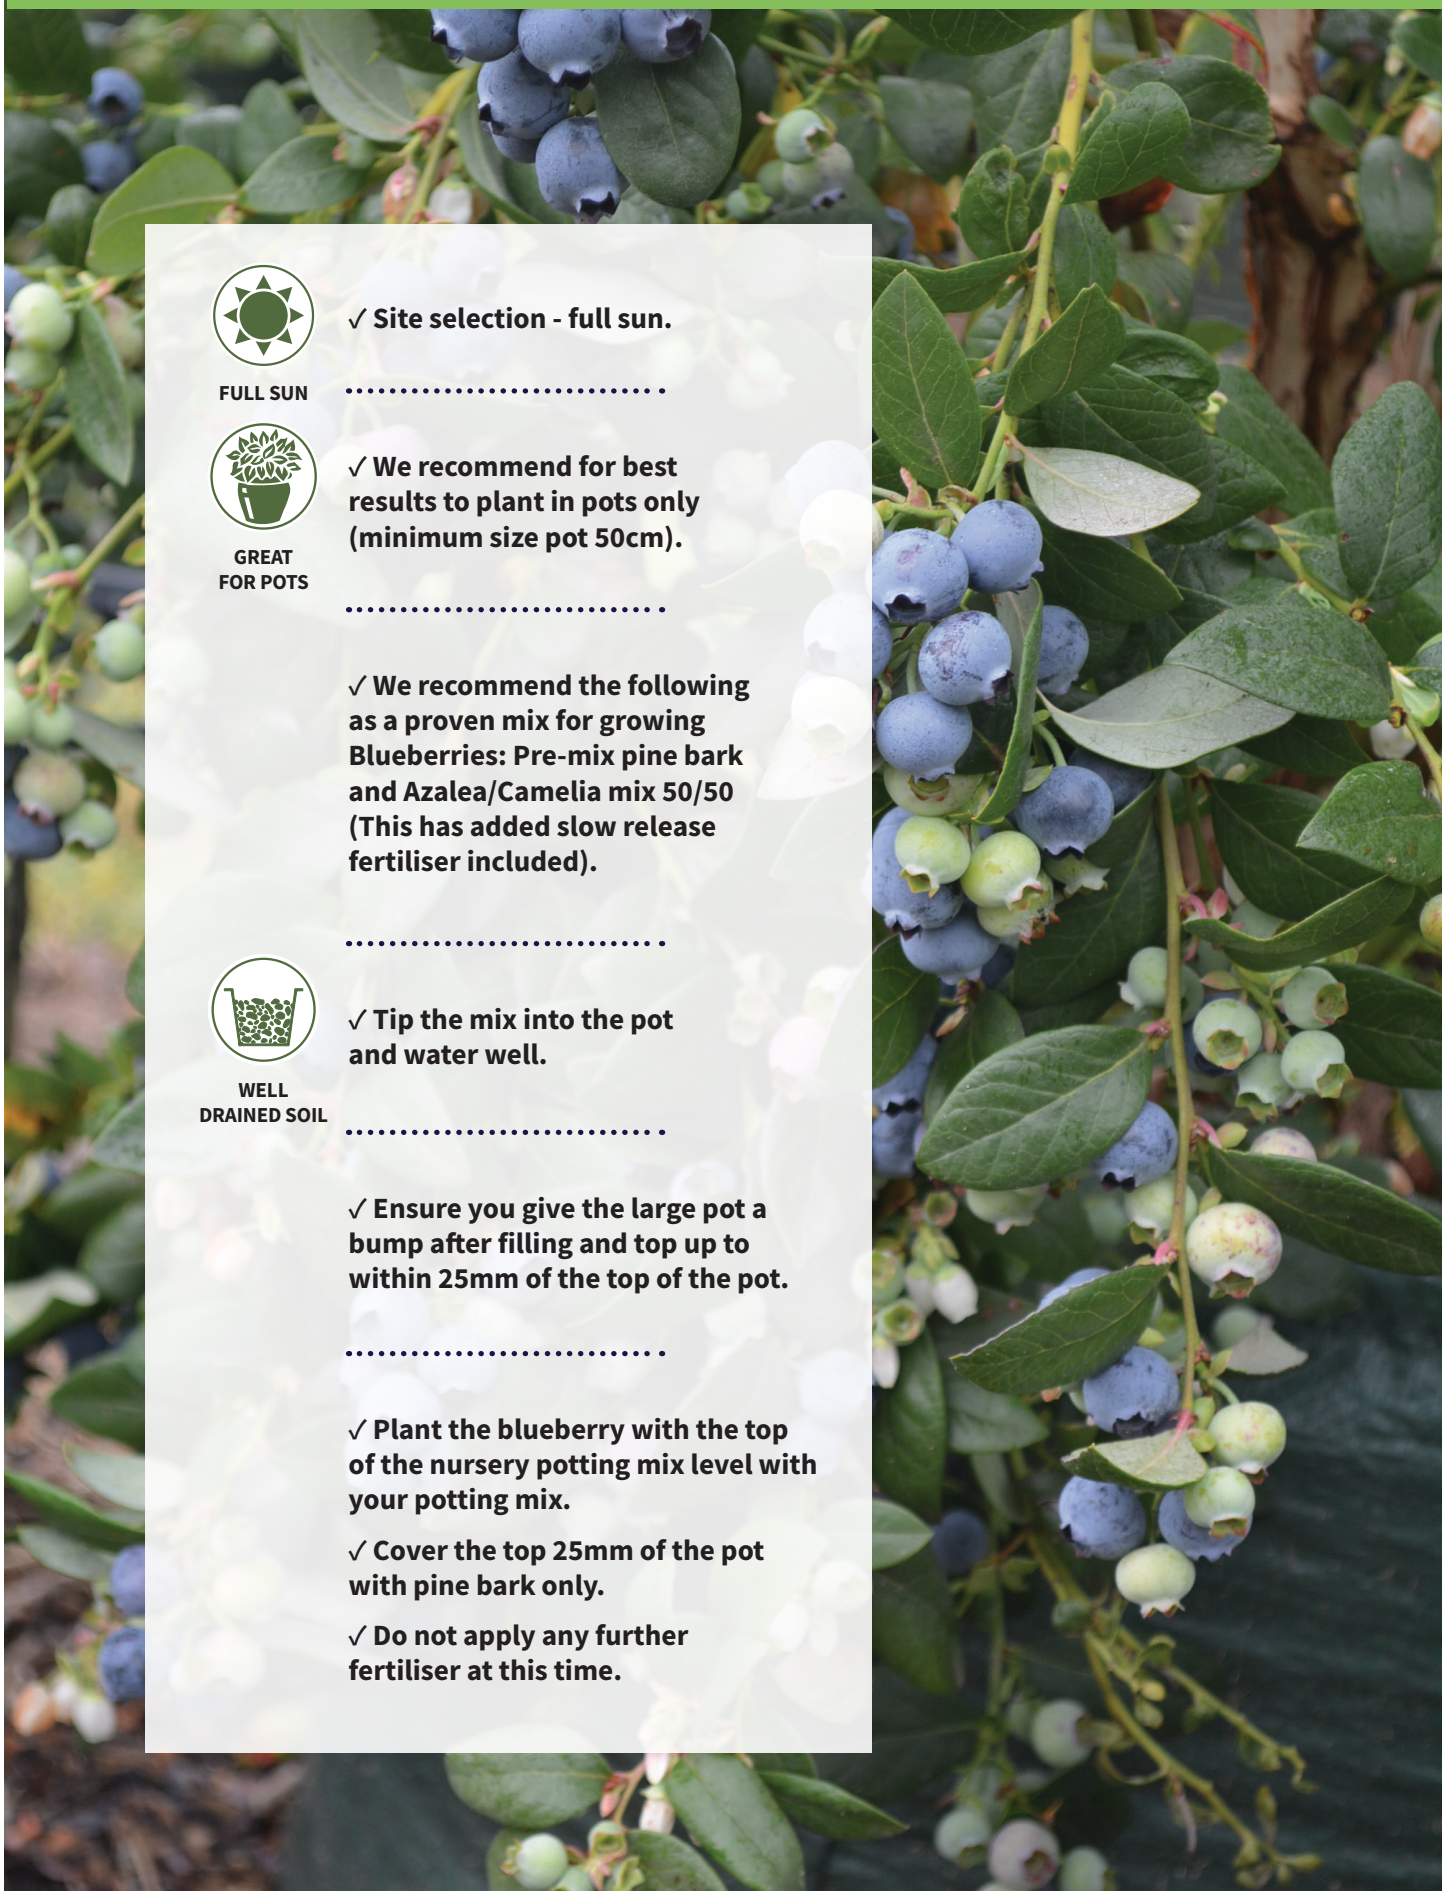
How to Plant: **BLUEBERRIES**



FULL SUN

✓ **Site selection - full sun.**

GREAT FOR POTS

✓ **We recommend for best results to plant in pots only (minimum size pot 50cm).**

✓ **We recommend the following as a proven mix for growing Blueberries: Pre-mix pine bark and Azalea/Camelia mix 50/50 (This has added slow release fertiliser included).**

WELL DRAINED SOIL

✓ **Tip the mix into the pot and water well.**

✓ **Ensure you give the large pot a bump after filling and top up to within 25mm of the top of the pot.**

✓ **Plant the blueberry with the top of the nursery potting mix level with your potting mix.**

✓ **Cover the top 25mm of the pot with pine bark only.**

✓ **Do not apply any further fertiliser at this time.**
